

The International Workshop on
Cyber Physical and Social Computing (CPSC2009)

held in conjunction with
 The 6th International Conference on Autonomic and Trusted Computing (ATC'09)
 Brisbane, Australia, 7 -10 July, 2009

General Chairs

Benxiong Huang,
Huazhong Univ. of Sci. & Tech., China
 Ajith Abraham,
Norwegian Univ. of Sci. & Tech., Norway
 Jemal Abawajy,
Deakin Univ., Australia

Program Chairs

Furong Wang,
Huazhong Univ. of Sci. & Tech., China
 Bin Xie,
Carnegie Mellon University, USA
 Dion Goh,
Nanyang Technological Univ., Singapore

Steering Chairs

Jianhua Ma,
Hosei Univ., Japan
 Laurence T. Yang,
St. Francis Xavier Univ., Canada

Publicity Chairs

Chunming Rong,
Univ. of Stavanger, Norway
 Lai Tu,
Huazhong Univ. of Sci. & Tech., China
 Lei Shu,
National Univ. of Ireland, Ireland
 Lawrence Y. Deng,
St. John's Univ., Taiwan
 Jeffrey Fan,
Florida International Univ., USA

Advisory Committee

Stephen S. Yau,
Arizona State Univ., USA
 Jeffrey J.P. Tsai,
Univ. of Illinois at Chicago, USA
 Jadwiga Indulska,
Univ. of Queensland, Australia
 Jhing-Fa Wang,
Nat. Cheng Kung Univ., Taiwan
 Weijia Jia,
City Univ. of Hong Kong, HK
 Junzhou Luo,
Southeast Univ., China
 Nagula Sangary,
RIM, Canada

Program Committee

cpsc2009@gmail.com

The physical things and the human society have formed into the world we live in, however the emergence of the information technologies that enable the new infrastructure for a technical, economic and social revolution have changed the world we are used to. Cyber-Physical Systems (CPS) are integrations of computation with physical processes. Embedded computers and networks monitor and control physical processes in feedback loops where physical processes affect computations and vice versa.

Social computing has become more widely known because of its relationship to a number of recent trends. The premise of social computing is that it is possible to design digital systems that support useful functionality by making socially produced information available to physical things. Certainly, the cyber physical systems will further benefit from inherent social behaviour thus supply better services.

Therefore the integration of computational and physical processes as well as human's social behaviour exhibits a variety of complicated systems that can not be analyzed by the computational or physical or social sciences alone. These systems also transcend traditional computer-controlled systems because of their scale, dependence on man-machine interaction, knowledge of social information and their rich communication infrastructure that is enabled by various kinds of networks including the Internet.

The International Workshop on Cyber Physical and Social Computing (CPSC2009) is an international forum for researchers to exchange information regarding advancements in the state of the art and practice of cyber physical and social computing, as well as to identify the emerging research topics and define the future. The technical program of CPSC2009 will consist of invited talks, paper presentations, and panel discussions.

Topics of Interest:

- Fundamentals of cyber physical and social computing
- Grand challenges for cyber physical and social computing
- Features and requirements of cyber physical and social computing
- Architecture and infrastructure for cyber physical systems
- Applications and experiences of cyber physical systems
- Modeling and analysis of social networks
- Dynamics and evolution patterns of social networks, trend prediction
- Communities discovery and analysis in large scale social networks
- Innovative applications of social network analysis
- Data mining advances on the discovery and analysis of communities
- Scalable, customizable social network infrastructure construction
- Security, privacy, trust and safety of cyber physical & social computing

Important Dates

Paper Submission Deadline:	15 February 2009
Paper Status Notification:	20 March 2009
Camera-ready Due	20 April 2009

Paper Submission

See the workshop webpage: <http://malab.cis.k.hosei.ac.jp/cpsc/>

Paper Publication

The workshop proceedings will be published by IEEE CS Press (EI indexed).
